

Tipping Trailer Side Mount Kits to Retrofit to meet London Safer Cycling Scheme

What is in the kit:

2 x galvanised cross rails

4 x clamping brackets for attaching to trailer I beam

4 x sideguard rails 3000 mm long (if too long for your application cut to length) Most tipping trailers vary between 2700 mm and 3000 mm.

2 x alloy end profiles

4 x plastic caps for rails

4 x plastic caps for profiles

4 x mounting plates for chassis to cross rail nuts and bolts

All nuts and bolts to assemble kit.

Advantage of kit: simple fit with no drilling of chassis required.

Contact: www.newtontrailers.com 01525 872466

Adjustable to chassis width and side mounting height.

Clamps to bottom rail of the chassis I beam with galvanised clamping brackets.

Simple bolt on clamping bracket to fit to trailer bottom flange.
