## Moving boundaries

Since 1984, we have been focussing on continuous improvement of a single product: the moving-floor trailer. Each time we slightly raise the bar. This is how we create unique and reliable inventions and innovations. Our trailers have been developed with the smallest detail in mind. This way we guarantee our customers trouble free operation for many years, the lowest overall costs and the highest residual value. We are committed to it and our customers may hold us to that.

**By moving boundaries we have been creating an edge within our industry for more than 30 years.**

**Robot welded**

**Extensively tested**

**More than 30 years experience**
